

# End Suction Norm Pumps

## DanPumps S-ENP (DN 32 - DN 150 mm)

### Product Applications

The DanPumps S-ENP pump constructed to EN 733 standards, is designed for clean or slightly contaminated low viscosity liquids without solid and fibrous particles.

### Technical data

Discharge Flange	DN 32 - DN 150 mm
Capacity	up to 600 m <sup>3</sup> /h*
Head	up to 100 m*
Speed	up to 3000 rpm
Design Temperature	-10° C to +140° C**
Casing Pressure (Pmax***)	10 bar (16 bar)**

\* Contact company for higher capacity and head values.

\*\* The Material of pump diers according to the type of pumped liquid, operating temperature and pressure. Contact for detailed information.

\*\*\* Pmax: Suction Pressure + Shut off Head

### Pump Designation

**S-ENP**   **100** - **150** - **XXX**  
Pump type   Discharge Nozzle (DN-mm)   Nominal Impeller Diameter (mm)   Special Application

### Design Features:

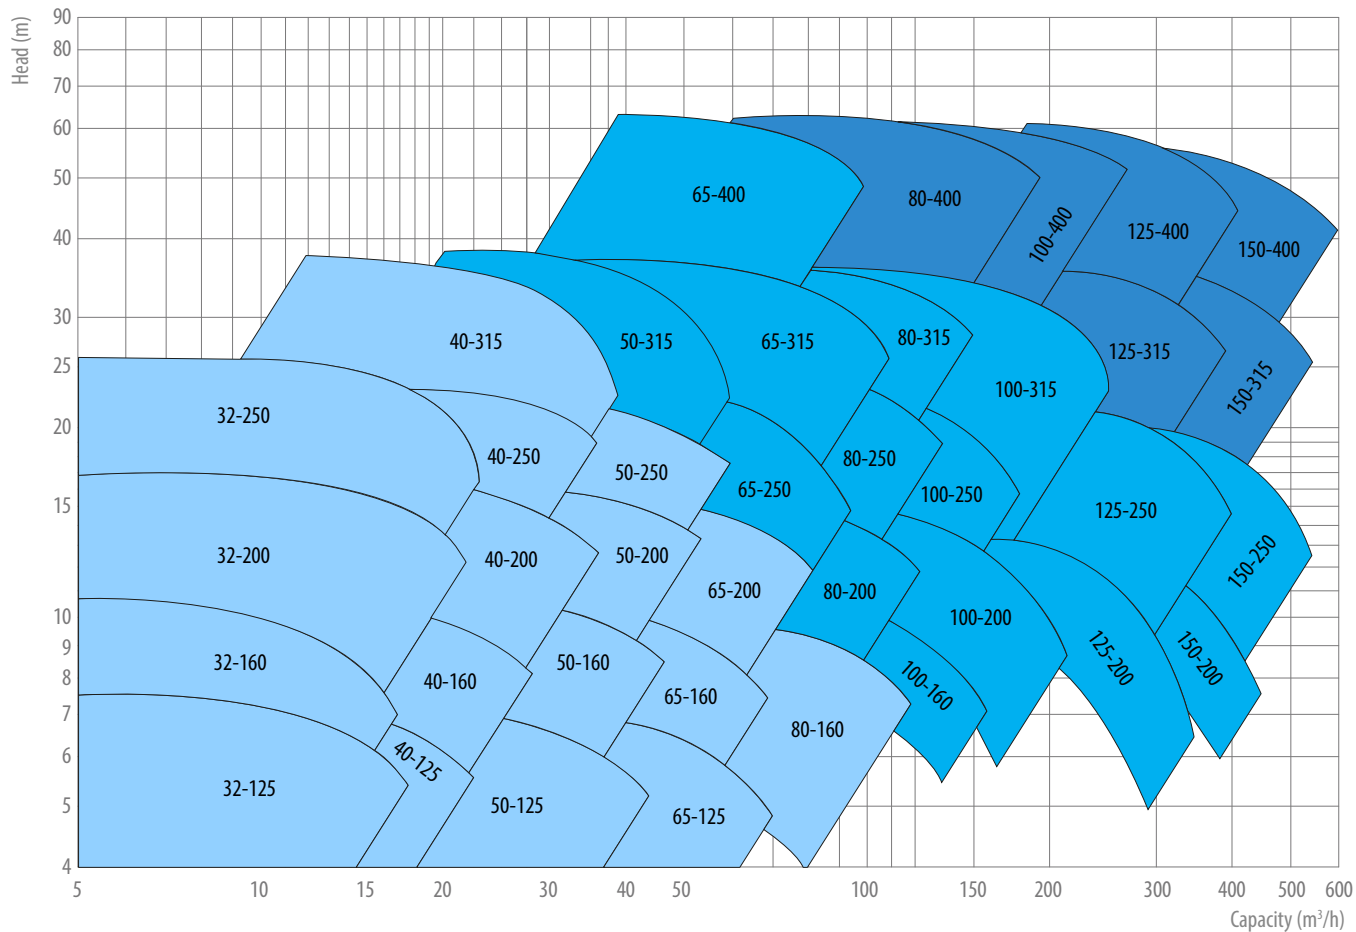

- Horizontal, radially split volute casing type, single stage, end suction centrifugal pump with closed impeller.
- Dimensionally complies with EN 733.
- Complies EU547/2012 regulations.
- In addition to 29 basic sizes conforming with EN 733, there are 9 additional sizes. Dimensions of additional sizes may differ from other suppliers.
- S-ENP 40-315, 50-315, 65-315, 80-315, 100-315, 125-250 pumps are given with 3000 rpm only for fire fighting applications.
- Suction and discharge flanges conform to EN 1092-2/PN 16. (EN 1092-1/PN16 for steel or stainless steel casing). If requested, ANSI/ASME flanges can be supplied.
- The complete bearing assembly including impeller and casing cover can be dismantled without removing the volute casing from the piping system. (Take out the rotor group without dismantling the electric motor, with spacer coupling application).
- All impellers are balanced dynamically or statically according to ISO 1940 grade 6.3.
- Axial thrust is balanced by impeller balancing holes system.
- Direction of rotation is clockwise viewed from drive end. If requested, a wear ring and/or shaft sleeve can be supplied.
- Bearings of S-ENP pumps are normally "lifetime grease-lubricated" ball bearings. If requested, oil lubrication or re-greasable bearing can be supplied.

### Shaft Sealing

- The standard shaft seal is a mechanical Carbon/Silicon carbide with EPDM.
- Different seal variants are available depending on customer request and liquid type.
